

The Cincinnati Section of the American Chemical Society
Records
(1890-2005)
Collection No. 23

Abstract

The records of the Cincinnati Section of the American Chemical Society (ACS) were donated by former section chairman Philip A. Christenson in 2005. The collection is primarily comprised of materials from the Cincinnati Section of the ACS; however, it also includes materials from the national ACS headquarters, various local and regional ACS bodies, and other affiliated organizations. The bulk of the collection consists of annual reports, event documentation, election records, membership rosters, directories, newsletters, and correspondence. Other significant items include board meeting minutes, national meeting materials, calendars, seminar and project materials, financial reports, and reprints of relevant journal articles. The collection contains materials from approximately 1890 to 2005, with the majority of items dating from the 1950s to the 1990s. Volume: 50 boxes, approximately 21 lin. ft.

Institutional Sketch

The American Chemical Society (ACS) was officially established on April 6, 1876 by 35 chemists at New York University. While it was not the first scientific society to be formed, the founding members specifically hoped that, for the fields of theoretical and applied chemistry in particular, the ACS would “prove a powerful and healthy stimulus to original research... would awaken and develop much talent now wasting in isolation... [bring] members of the association into closer union, and ensure a better appreciation of our science and its students on the part of the general public.” By the time of its incorporation under New York State law in 1877, the Society had acquired 133 additional members from neighboring cities on the Atlantic coast. The American Chemical Society since has grown to become the world’s largest scientific society, counting as members over 161,000 scientific professionals across 188 local chapters.

Among these local chapters of the national organization is the Cincinnati Section of American Chemical Society. The origins of the Cincinnati chapter date to February 10, 1877, when several Cincinnati chemists established the Cincinnati Chemical Society, just a year after the formation of the American Chemical Society. This original organization did not flourish, despite an attempt made by Dr. Alfred Springer at resurrecting it in 1880. Ultimately, however, the Society was successfully revived in 1890 by professor Thomas Herbert Norton and 22 other area chemists. In 1891, Norton petitioned to have the Society admitted as a local chapter of the American Chemical

Society. Norton's request was granted on March 29, 1892, establishing the Cincinnati Section as the third oldest ACS local chapter. Both Norton and Springer served as early chairman of the local section. Other significant early members of the section include John Uri Lloyd and George Rieveschl, Jr., both of whose personal papers reside at the Lloyd Library.

The Cincinnati Section of the American Chemical Society celebrated its centennial anniversary in 1992. As of 2000, the local section had grown from its original 22 members to over 1,700 members.

Scope and Contents

- **Series A: Administrative Materials:** Contains miscellaneous administrative files and materials related to the organization's history, committee activities, associated societies, and local and national boards. 23 boxes
 - **Subseries 1: Annual Reports:** Contains yearly reports (and supporting documentation) on local section events and activities.
 - **Subseries 2: Awards:** Contains materials related to awards and award nominations, including correspondence, curriculum vitas of nominees, and promotional materials.
 - **Subseries 3: Board Meeting Materials:** Contains announcements, minutes, and supporting materials from meetings of the local section Board of Directors.
 - **Subseries 4: Committees:** Contains committee assignments, correspondence among committee members, and committee reports.
 - **Subseries 5: Constitution and Bylaws:** Contains local and national constitutions and bylaws, as well as the bylaws of related organizations.
 - **Subseries 6: Elections:** Contains nomination lists, election mailings, and election results.
 - **Subseries 7: ESC/TSC:** Contains materials concerning the Engineering and Technical Societies of Cincinnati, including awards, correspondence, membership, and ESC building usage fees.
 - **Subseries 8: Handbooks & Manuals:** Contains handbooks and manuals from the local section and national organization relating to job responsibilities.
 - **Subseries 9: National Council/Board Meeting Materials:** Contains minutes and supporting materials from national council/board meetings.
- **Series B: Correspondence:** Contains miscellaneous organizational correspondence. ½ box
- **Series C: Event Materials:** Contains correspondence, promotional materials, and financial records related to local and national events. 7 boxes

- **Subseries 1: Calendars:** Contains annual event and program calendars and supporting materials.
- **Subseries 2: National:** Contains correspondence, announcements, and other materials relating to national events.
- **Subseries 3: Non-ACS:** Contains correspondence, announcements, and other materials relating to non-ACS events.
- **Subseries 4: Regional:** Contains correspondence, announcements, and other materials relating to regional events, including the Central Regional Meeting.
- **Subseries 5: Regular Meetings:** Contains correspondence, announcements, and other materials relating to regular local section meetings.
- **Series D: Financial Materials:** Contains materials related to expenses, taxes, and section funds. 1 ½ boxes
 - **Subseries 1: Reports:** Contains financial and budgetary reports.
- **Series E: Membership Materials:** Contains applications, correspondence, and reports related to membership. 5 ½ boxes.
 - **Subseries 1: Directories:** Contains local and national member and officer directories.
 - **Subseries 2: Membership Rosters:** Contains listings of members of the local section. Includes several rosters that were received digitally.
- **Series F: Photographs:** Contains photographs from significant section events. ½ box
- **Series G: Publications:** Contains various publications from local ACS sections, the national organization, and associated bodies. Includes newsletters, pamphlets, and reports. 3 ½ boxes
 - **Subseries 1: National:** Contains publications from the National ACS headquarters.
- **Series H: Reprints:** Contains reprints of articles. Note: Articles that are present in the Lloyd's published volumes were discarded (see attached discard list). From Solomon Schwartzman. Folder names were copied from the original files (unless [bracketed]) 2 ½ boxes
- **Series I: Research and Projects:** Contains research and project materials From Solomon Schwartzman. Folder names were derived from the original files. 2 ½ boxes + 10 Loose Files.
- **Series J: Seminar and Course Materials:** Contains syllabi, tests, and notes from various chemistry courses. Folder names were derived from the original files. From Solomon Schwartzman. 4 boxes

Series H: Reprints – Discards, By Folder

Enzymatic Activity – Cellular Oxidation

“Biological Catalysis of the Exchange Reaction Between Water and Hydrogen,” Henry D. Hoberman & D. Rittenberg, *Journal of Biological Chemistry*, Vol. 147, No. 1, January 1943.

“Photosynthesis and Phosphorylation,” S. Ruben, *Journal of the American Chemical Society*, Vol. 65, No. 279, 1943.

“The Use of Isotopically Marked Carbon in the Study of Intermediary Metabolism,” John M. Buchanan & A. Baird Hastings, *Physiological Reviews*, Vol. 26, No. 1, January 1946.

“The Effect of Body Temperature on Drug Action,” Frederick A. Fuhrman, *Physiological Reviews*, Vol. 26, No. 2, April 1946.

“Changing Concepts of the Chemistry of Muscular Contraction,” Jacob Sacks, *Physiological Reviews*, Vol. 21, No. 2, April 1941.

“Cellular Oxidation Systems,” E. S. Guzman Barron, *Physiological Reviews*, Vol. 19, No. 2, April 1939.

“The Intermediary Metabolism of Fatty Acids,” William C. Stadie, *Physiological Reviews*, Vol. 25, No. 3, July 1945.

“The Function of Phosphate in Cellular Assimilations,” H.M. Kalckar, *Biological Reviews*, Vol. 17, 1942.

“Whiter Enzyme Chemistry,” F. Schlenk, *Texas Reports on Biology and Medicine*, Vol. 2, No. 2, Spring 1944.

“On the Mechanism of Enzymatic Activity,” Alexandre Rothen, *Journal of Biological Chemistry*, Vol. 163, No. 1, April 1946.

“Section of Biology,” Alexander Sandow, *Transactions of The New York Academy of Sciences*, Vol. 7, No. 6, April 1945.

“Further Studies on Tyrosinase in Aerobic Plant Respiration,” Elsie M. Walter & J. M. Nelson, *Archives of Biochemistry*, Vol. 6, No. 1, January 1945.

“The Nature of Energetic Coupling in Biological Syntheses,” H. M. Kalckar, *Chemical Reviews*, Vol. 28, No. 1, February 1941.

“The Energetics of Transient and Steady States, With Special Reference to Biological Systems,” J. M. Reiner & S. Spiegelman, *Journal of Physical Chemistry*, Vol. 49, No. 2, March 1945.

Enzymes

“Manometric, Titrimetric, and Colorimetric Methods For Measurement of Urease Activity,” Donald D. Van Slyke & Reginald M. Archibald, *Journal of Biological Chemistry*, Vol. 154, No. 3, August 1944.

“On the Mechanism of Invasion: II. Proinvasin I, An Enzyme In Pathogenic Bacteria and In Venoms,” Erwin Haas, *Journal of Biological Chemistry*, Vol. 163, No. 1, April 1946.

"On the Mechanism of Invasion: I. Antinvasin I, An Enzyme in Plasma," Erwin Haas, *Journal of Biological Chemistry*, Vol. 163, No. 1, April 1946

"A New Method for the Measurement of Tyrosinase Catecholase Activity. II. Catecholase Activity Based on the Initial Reaction Velocity." Wilbur H. Miller, M. Frank Mallette, Lloyd J. Roth, Charles R. Dawson, *Journal of the American Chemical Society*, Vol. 66, No. 514, 1944.

"The Activity of Tyrosinase toward Phenol," Ralph C. Behm & J. M. Nelson, *Journal of the American Chemical Society*, Vol. 66, No. 709, 1944.

"The Aerobic Oxidation of Phenol by Means of Tyrosinase," Ralph C. Behm & J. M. Nelson, *Journal of American Chemical Society*, Vol. 66, No. 71, 1944.

"New Insoluble Active Derivative of an Enzyme As a Model for Study of Cellular Metabolism," M. A. Mitz, *Science*, Vol. 123, No. 3207, June 1956.

Yellow Enzymes/Purines

"The Equilibrium Relations of d-Amino Acid Oxidase, Flavin Adenine Dinucleotide, and Amino Acids From Kinetic Data," William C. Stadie & John A. Zapp, Jr., *Journal of Biological Chemistry*, Vol. 150, No. 1, September 1943.

"Substrate Specificity of Amine Oxidase," George A. Alles & Erik V. Heegaard, *Journal of Biological Chemistry*, Vol. 147, No. 3, March 1943.

"Inhibitor Specificity of Amine Oxidase," George A. Alles & Erik V. Heegaard, *Journal of Biological Chemistry*, Vol. 147, No. 3, March 1943.

"Rejuvenation of Phosphate In Adenine Nucleotides," Herman M. Kalckar, *Journal of Biological Chemistry*, Vol. 154, No. 1, June 1944.

"The Determination of the Purines," George H. Hitchings & Cyrus H. Fiske, *Journal of Biological Chemistry*, Vol. 140, No. 2, August 1941.

"The Estimation of Hypoxanthine," George H. Hitchings, *Journal of Biological Chemistry*, Vol. 143, No. 1, March 1942.

"The Estimation of Adenine," George H. Hitchings & Cyrus H. Fiske, *Journal of Biological Chemistry*, Vol. 141, No. 3, December 1941.
