

LLOYD

LIBRARY & MUSEUM

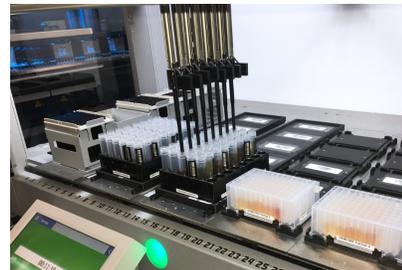

In the upcoming weeks, the Lloyd teams up with experts and community members, who are working to improve our lives. Plant-based research and conservation efforts are just some of what's on tap in the upcoming weeks with both in-person and virtual programming--and remember to check out programs on our [YouTube channel](#) anytime.

Drug Discoveries from Plant Research

When: Wednesday, February 15, 7-8 p.m.
Where: **Virtual Program**

Don't miss a one-time opportunity to participate in this program featuring leaders in medicinal plant research. Dr. Barry O'Keefe of the Center for Cancer Research at the National Cancer Institute will moderate presentations with Dr.

Nicholas Oberlies, Patricia A. Sullivan Distinguished Professor of Chemistry at University of North Carolina Greensboro, and Dr. Cassandra Quave, Curator of the Herbarium and Associate Professor of Dermatology and Human Health at Emory University as they discuss historic and groundbreaking research. This program will be presented to the virtual audience the evening of February 15 and not available online after that. **Registration required.**

Forest Conservation at the Edge of Appalachia

When: Thursday, February 23, 7-8 p.m.
Where: Lloyd Library

Join Mike Hall, Appalachian Forest Manager of The Nature Conservancy of Ohio, for a timely and engaging discussion of conservation at the Richard and Lucile Durrell Edge of Appalachia Preserve System of Adams County, Ohio. The Nature Conservancy not only conserves land to protect endangered species but works to restore forests. Learn more about efforts to support the

conservation and research of the wildlife in the forests and prairies of Ohio. **Registration required.**

Register for the in-person event

From Friend to Foe: the Story of the Invasive Callery Pear Tree

When: Wednesday, March 8, 7-8 p.m.

Where: **In person** at the Lloyd Library and also offered **virtually**

First imported from China, the Callery pear became one of the most popular ornamental trees in America. Its seeds were then carried by birds to nearby natural areas, frequently displacing other plant species. Today, an awareness is growing around its environmental impact and increasing number of states are listing the Callery pear as an invasive species. Ohio is the first state to ban its commercial sale and distribution. Dr. Theresa Culley, Head of the Department of Biological Sciences at the University of Cincinnati and member of the Ohio Invasive Plant Advisory Committee, explores the transition from popular garden tree to despised invader. **Registration required.**
