

# LLOYD

## LIBRARY & MUSEUM

Take the plunge into *The Mighty Deep*! The Lloyd thanks everyone who came to the opening this past Friday, but that's just the beginning. Our upcoming programs provide a look into the past through different perspectives--from prehistoric times to the 20th century.

## *Rest Rooms: The Sick Room in the American Home*

When: Wednesday, April 12, 7-8 p.m.  
Where: Lloyd Library

Reserve your seat for the lecture on Wednesday with 2023 Curtis Gates Lloyd Fellow Elizabeth Yuko as she shares her research on the connection between medical history and the home. Using a unique focus on the history and evolution of the

bedroom and sick room in American homes, Yuko explains how elements of the room promote rest, sleep, and health for not only the occupant(s), but the rest of the household as well. For more on the topic, Elizabeth Yuko discusses sick rooms in the age of COVID-19 on Cincinnati Edition.

**Registration required.**

## *Great Lakes Dredging in the Age of Ecology*

When: Thursday, April 20, 7-8 p.m.

Where: Lloyd Library

In the 1960s, Ohioans grew increasingly concerned about their polluted environment, particularly as dredges hoisted polluted silt from beneath murky waters and dumped it into cleaner waters. Public pressure led to new laws limiting open water dumping, permanently reshaping the Great Lakes. David Stradling, author, professor, and Director of Environmental Studies at the University of Cincinnati, tells the story of how the lowly dredge has remade and continues to remake our world. **Registration required.**

## *Playing at the Bottom of a 450-Million-Year-Old Ocean*

When: Wednesday, April 26, 7-8 p.m.

Where: **In person** at the Lloyd Library and also offered **virtually**

The rocks in the Cincinnati area are world-famous for the fossils, which come from an ancient ocean that covered most of North America 450 million years ago. Join Brenda Hunda, Curator of Invertebrate Paleontology at the Cincinnati Museum Center and Adjunct Professor at the University of Cincinnati, to explore the animal life and communities of this ancient ocean and discover what fossils can tell us about our modern marine ecosystems.
