## Restoring Rare Books

To keep collections ready for readers and scholars, conservation treatment is underway on a five-volume set of books published in the 1760's and previously featured in the 2021 exhibition *Incredible Insects*. This work on insects by German naturalist and artist August Johann Rösel von Rosenhof features vibrant hand-colored illustrations, but its leather binding was cracked, crumbling, and its pages were separating from the book itself. See the "before and after" pictures above for a glimpse at the restorative work done so far to ensure another 250-plus years of use.
