In Memoriam

The Lloyd Library & Museum remembers author Wendell Berry (1934-2026), whose life and work offered generations of readers a deeper way of thinking about our relationship with the land, with one another, and the living world around us. Taken from his 1977 work, *The Unsettling of America: Culture and Agriculture*, Berry expressed so much with his statement that “...the care of the earth is our most ancient and most worthy and, after all, our most pleasing responsibility. To cherish what remains of it, and to foster its renewal, is our only legitimate hope.”
